

Google Dorking Report: Publicly Exposed Documents or Directories from tesla.com

Objective

Use Google Dorks to find publicly accessible files or directories on tesla.com that could reveal potentially sensitive or interesting information. Only legal and ethical methods (public search results) are used.

TASK

Entry 1: Tesla Financial Report(PDF)

- Google Dork Used: site:tesla.com intitle:"index of"
- Link to Exposed File: https://ir.tesla.com/_flysystem/s3/sec/000156459021004599/tsla-10k_20201231-gen.pdf
- File Type: PDF
- Title: Tesla, Inc. Form 10-K Annual Report (2020)
- Description: This is a public SEC filing hosted on Tesla's investor relations subdomain. It contains business and financial data for the fiscal year ending December 31, 2020. While public, it demonstrates how valuable data is indexed and accessible through advanced search.

Entry 2: Admin HR Job Page (Public URL with "admin" in Path)

- Google Dork Used: site:tesla.com inurl:admin
- Link to Exposed File: <https://www.tesla.com/careers/search/job/admin-hr-business-partner-226186>
- File Type: HTML/Web Page
- Title : Admin, HR Business Partner ? Careers Page
- Description: A public job listing page from Tesla's careers portal. The keyword admin appears in the URL, but the page is not a sensitive admin panel. This highlights that dorking results must be verified manually to distinguish between admin interfaces and content-related keywords.

Entry 3: XML File Discovery Attempt

- Google Dork Used: site:tesla.com filetype:xml
- Result: No results were returned.
- Explanation: Google search did not return any .xml files under the tesla.com domain. This could be due to Tesla restricting access to .xml files via robots.txt, using CDN or dynamic endpoints, or configuring headers that prevent indexing.

Entry 4: Sensitive Data Search ? XLS/CSV/LOG

- Google Dork Used: site:tesla.com filetype:xls
 - site:tesla.com filetype:log
 - site:tesla.com intitle:"index of" xls OR csv OR log
- Result: No publicly indexed files returned.
- Explanation: These results suggest Tesla restricts access to such file types (likely via access controls or indexing prevention), reducing the risk of accidental exposure.

SUMMARY TABLE

#	Google Dork Used	Description
1	site:tesla.com intitle:"index of"	Found public 10-K PDF file
2	site:tesla.com inurl:admin	Found HR job listing page ("admin" in URL)
3	site:tesla.com filetype:xml	No publicly indexed XML files found
4	site:tesla.com filetype:xls/ log / csv	No sensitive files found
