

TASK-2

GOOGLE DORKING - IDENTIFYING

PUBLICALLY EXPOSED FILES

OBJECTIVE:

To identify publicly accessible and potentially sensitive files or directories on a target domain using Google Dorking techniques.

GOOGLE DORK USED:

Publically Accessible Documents:

- *site:mazda.com filetype:pdf*

This Google dork searches for PDF files indexed by Google under the domain mazda.com. These files may contain publicly available documents, reports, whitepapers, or potentially sensitive data unintentionally made available.

Link:

summary20230808_e.pdf <https://share.google/PG2NI3N6ZfNA6yyOL>

This document summarizes Mazda Motor Corporation's consolidated financial performance for the first quarter of FY2024 (April–June 2023). It includes key figures such as net sales, income, and regional performance, along with comparisons to FY2023 and forecasts for FY2024. The summary also highlights production volumes, global sales, capital expenditures, and currency exchange rates.

- *site:mazda.com filetype:docx*

This Google search command is used to find publicly available Word documents (.docx files) hosted specifically on Mazda's official website (mazda.com).

Link:

<https://share.google/uNuOHWJ39Wjo1vY6Z>

This document is a form to be filled out and submitted by authorized dismantlers or recycling operators to Mazda Corporation. It serves as an official application and invoice for claiming handling fees after performing forced discharge processing on capacitors from end-of-life vehicles. The form requires detailed entries including applicant information, vehicle and capacitor identifiers, processing dates, and bank account details for reimbursement.

Open Directory Listings:

- ***site:mazda.com intitle:"index of"***

This command searches for directory listings on Mazda's official website. The *intitle:"index of"* part targets pages that display raw directory structures—often due to improper server configurations—which may expose files or folders not meant for public access.

Link:

2023gri_e.pdf <https://share.google/0MEakWF2ml3qc7idd>

This file contains Mazda's 2023 GRI (Global Reporting Initiative) Content Index, which maps the company's sustainability disclosures to specific GRI Standards.
