

TRYHACKME CTF - PICKLE RICK

The Pickle Rick room is a beginner-level CTF challenge based on the Rick and Morty universe. The goal is to find three secret ingredients to help Rick become human again. This room teaches basic enumeration, web exploration, and Linux terminal usage.

Tools Used:

Nmap – For port scanning

Web browser – For checking the target website

Linux Terminal – For running commands on the machine

cat / ls – Basic Linux file reading and listing

After starting the machine I get Target IP:10.10.129.152. Then I did port scan nmap -sV 10.10.129.152.

Web page exploration:

Opened <http://10.10.129.152> in browser and viewed page source and found a possible hint.

Accessed robots.txt and acquired password for the username earlier found in the page source.

Tried Credentials:

Username: R1ckRul3s

Password:wubbalubbadubdub

And login into the url: <http://10.10.129.152/login.php>. After that there is a command panel and found portal.php and got 1st ingredient mr.meeseek.hair.

Moving on got the second ingredient with cat second ingredient which was jerry tear.

And 3rd ingredient with 3rd.txt which was fleeb juice.

WHAT LEARNED:

How to use nmap , how to explore web files, how to interact with a remote shell and so on.
