

NEIGHBOUR CTF TRYHACKME

STEP 1:

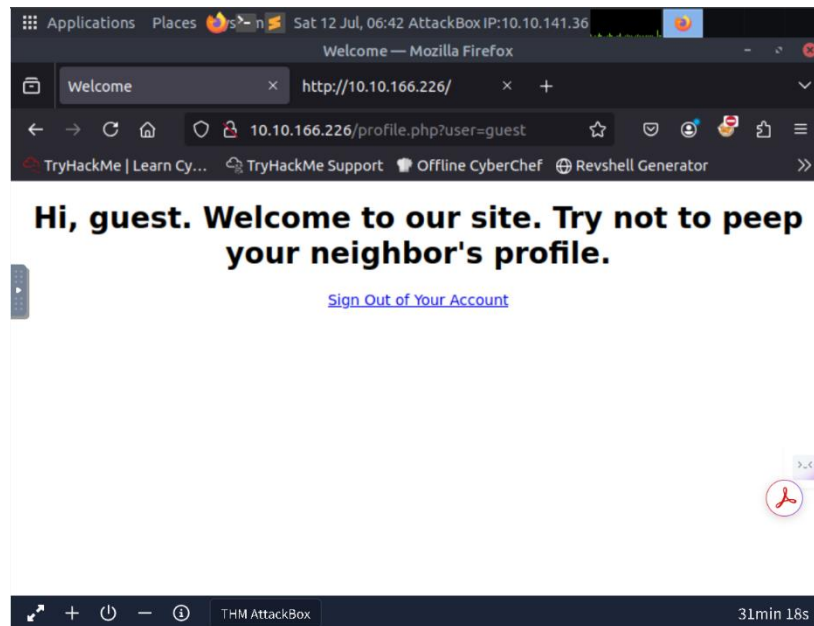

After clicking ctrl+u , the source code of the website opens in which we can find further details

STEP 2:

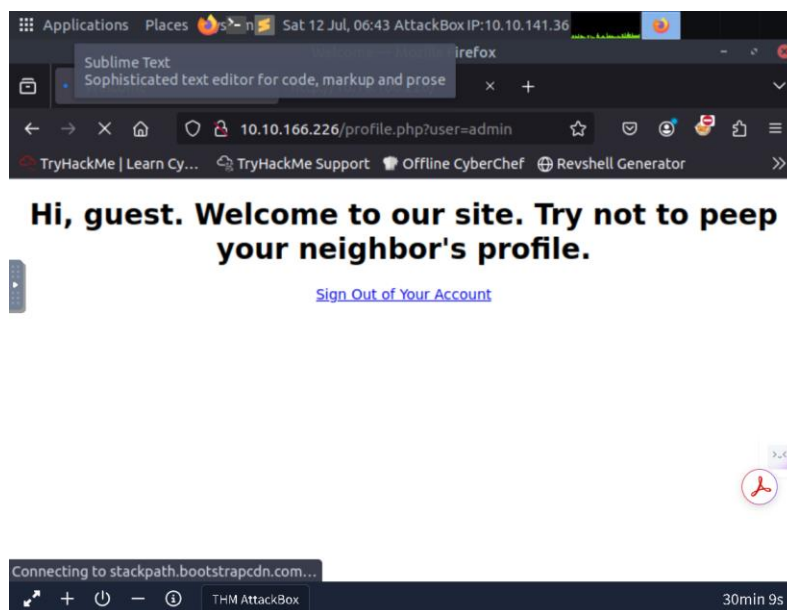

From here we can see that the user and password for guest is (guest: guest). And also some remarks about admin also mentioned here.

STEP 3:

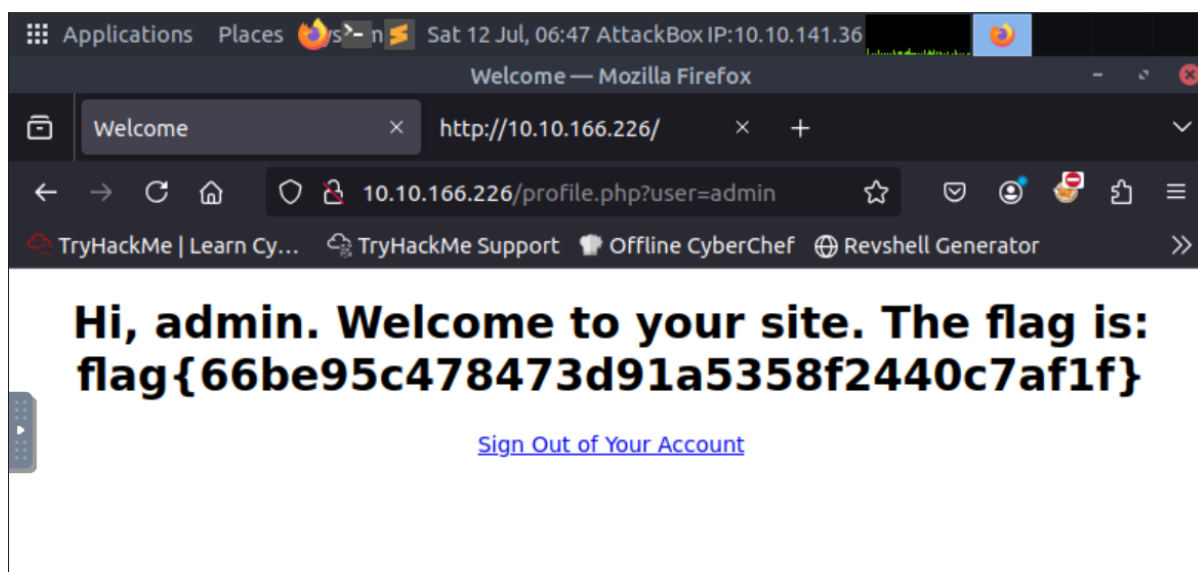

We have now successfully entered the guest website. From here we can see that user = guest in the URL. From earlier source page we know that admin user name is 'admin' itself. So, we change guest to admin in the URL and another site opens.

STEP 4:

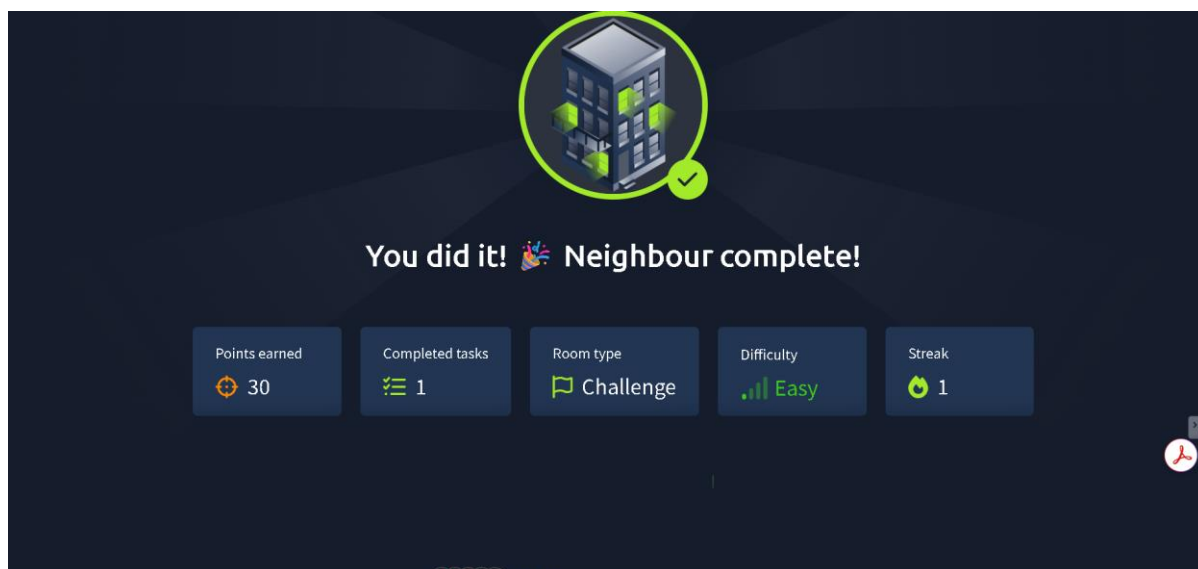

We changed the user to admin and pressed enter to run the URL.

And now we obtained the flag.

STEP 5:

We have successfully completed the task Neighbour in Tryhackme.
